

AEROTEST SIMULTAN HP

ALWAYS ON THE SAFE SIDE

Increasing damage to the environment and enforced regulations for breathing air quality such as the new DIN EN 12021 demand more and more strict requirements of the operators of filling stations.

With the portable air test laboratory **AEROTEST SIMULTAN HP** by Dräger on hand you are always on the **safe side**.

## SAFE

The portable air test laboratory **AEROTEST SIMULTAN HP** enables you to carry out testing of the breathing air quality acc. to DIN 3188 and the new, **more strict DIN EN 12021** standards.

The test tubes are an accurate system monitoring the values of **oil mist**, **CO<sub>2</sub>**, **CO** and **water vapour** in the compressed air.

The equipment will allow up to four harmful substances to be measured **simultaneously**. It is **not necessary** to **calibrate** the measuring device via a compressed air measuring tube before the testing procedure.

The pressure reducer and special orifice plates guarantee a **constant flow** and **continuous measuring** facility.

## COMFORTABLE

The air test laboratory **AEROTEST SIMULTAN HP** is **very easy** to handle:

- blow the connecting coupling
- connect measuring device with the compressed air outlet and purge the unit
- insert the measuring tubes
- open pressure valves for the measuring period
- evaluation of the test tubes using the enclosed chart

**READY!**

## QUICK

The actual measuring - **QUICK CHECK** - lasts **5 minutes** only!

## TECHNICAL DATA

<b>Dimensions*</b> :	LxWxH 30x36x8cm
<b>Weight:</b>	approx. 3 kg
<b>Intake pressure:</b>	200 / 300 bar
<b>Connection:</b>	G 5/8"
<b>Flow:</b>	0,2 l/min and 4,0 l/min
